## WARNING!

US Always use both hands while folding and unfolding the ladder.

ES Siempre use ambas manos mientras plegar y desplegar la escalera.

FR Utilisez toujours les deux mains pour ouvrir et fermer l'échelle.

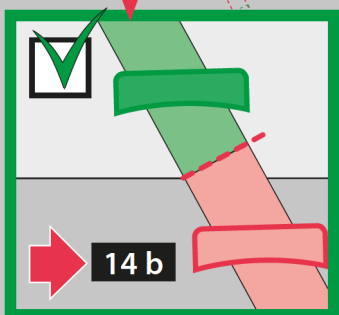

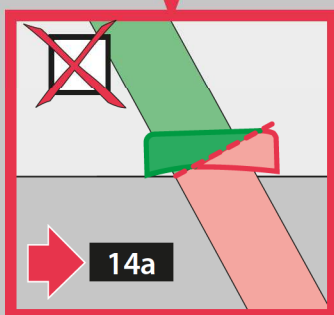

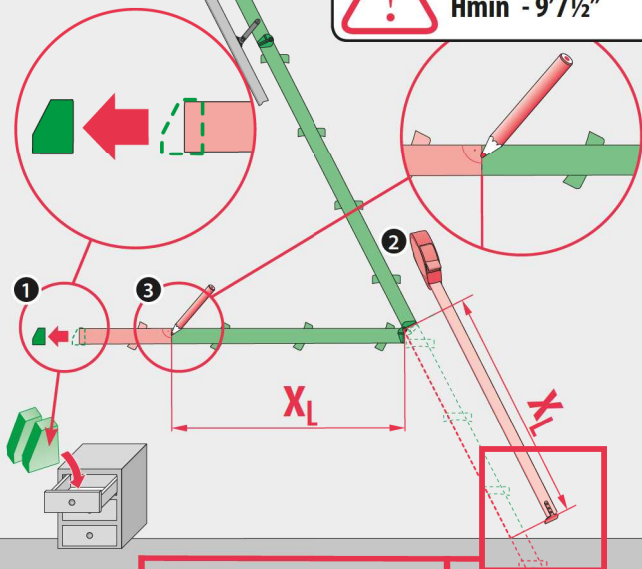

14

Hmax - 11'10"

Hmin - 9'7½"

US

To avoid cutting the ladder on the step, screw in the adjustment screws. Verify if both screws are properly adjusted. Note: When changing the angle of the ladder with the adjustment screw, it is forbidden to unscrew the screw further than 3/8" as shown in the figure below.

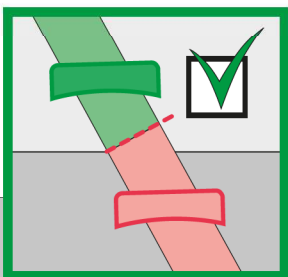

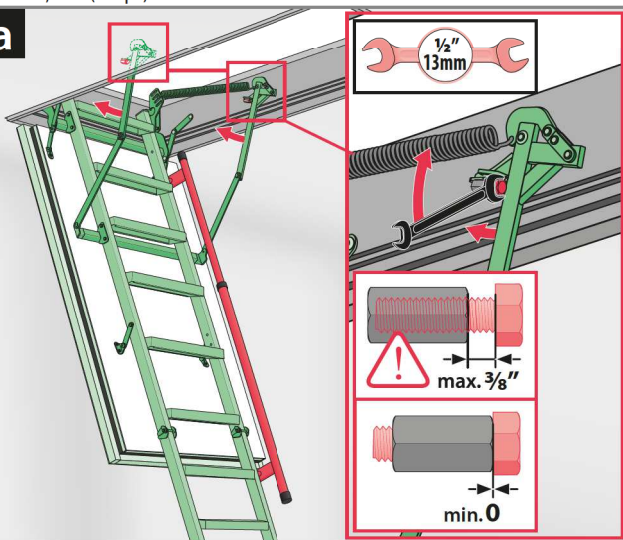

ES

Para evitar cortar la escalera en el escalón, atornille los tornillos de ajuste. Verifique que ambos tornillos estén correctamente ajustados. Nota: Al cambiar el ángulo de la escalera con el tornillo de ajuste, está prohibido destornillar el tornillo más de 3/8"

FR

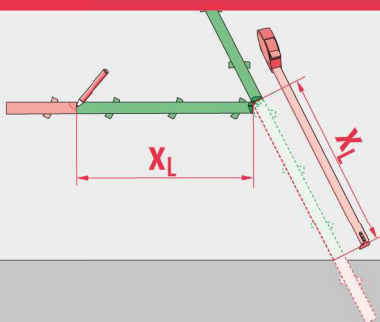

Pour éviter d'avoir à couper l'échelle à la première marche, vissez les vis de réglage. Veuillez vous assurer que les deux vis sont ajustées correctement. Nota : lorsque vous modifiez l'angle de l'échelle avec la vis de réglage, vous ne devez pas dévisser la vis au-delà de 0,8 cm (3/8 po).

## WARNING!

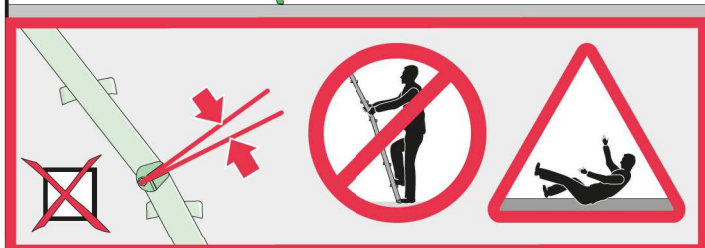

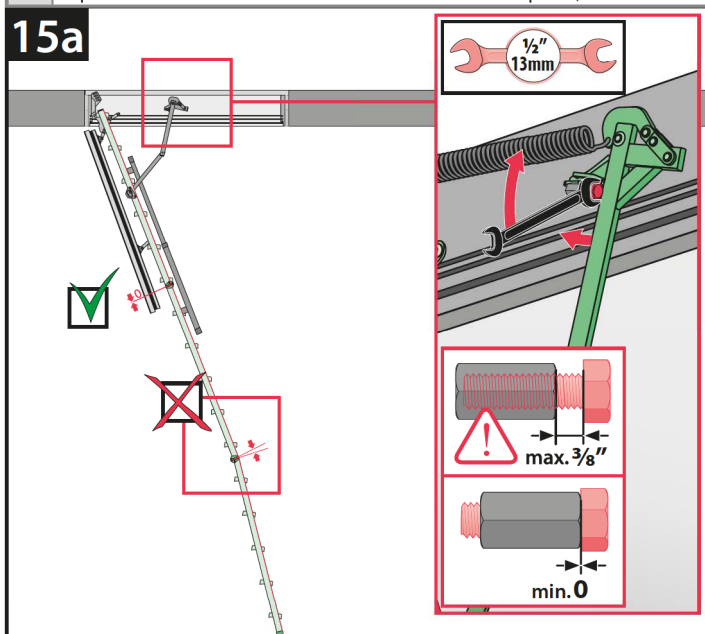

|    |                                                                                                                                                                                           |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| US | After cutting the ladder to the required height, smooth the edges of the cut. <b>CAUTION:</b> Sharp edges may cause injuries. Proceed with caution!.                                      |
| ES | Después de cortar la escalera a la altura requerida, los bordes deben ser lijados. <b>NOTA:</b> Los bordes afilados pueden causar lesiones. Tenga mucho cuidado                           |
| FR | Après avoir coupé l'échelle à la hauteur souhaitée, adoucir la surface de coupe. <b>ATTENTION:</b> Les bords tranchants ou rugueux peuvent causer des blessures. Procéder avec prudence!. |

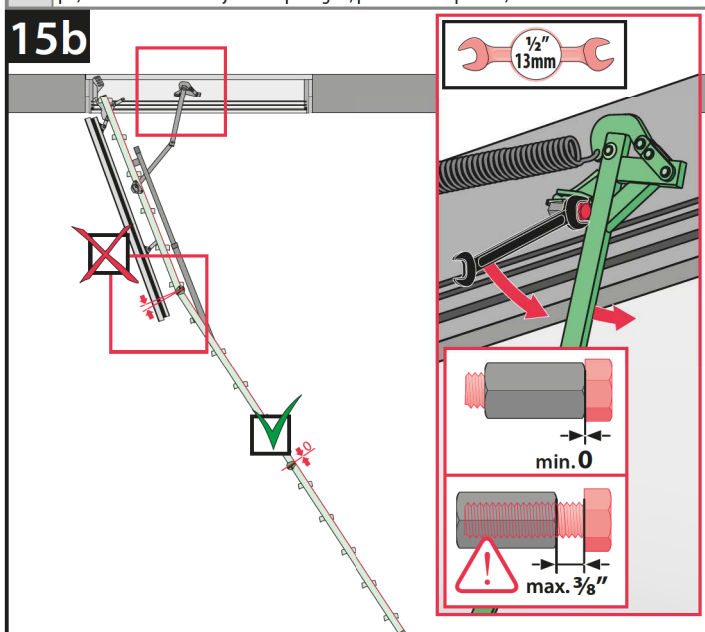

14c

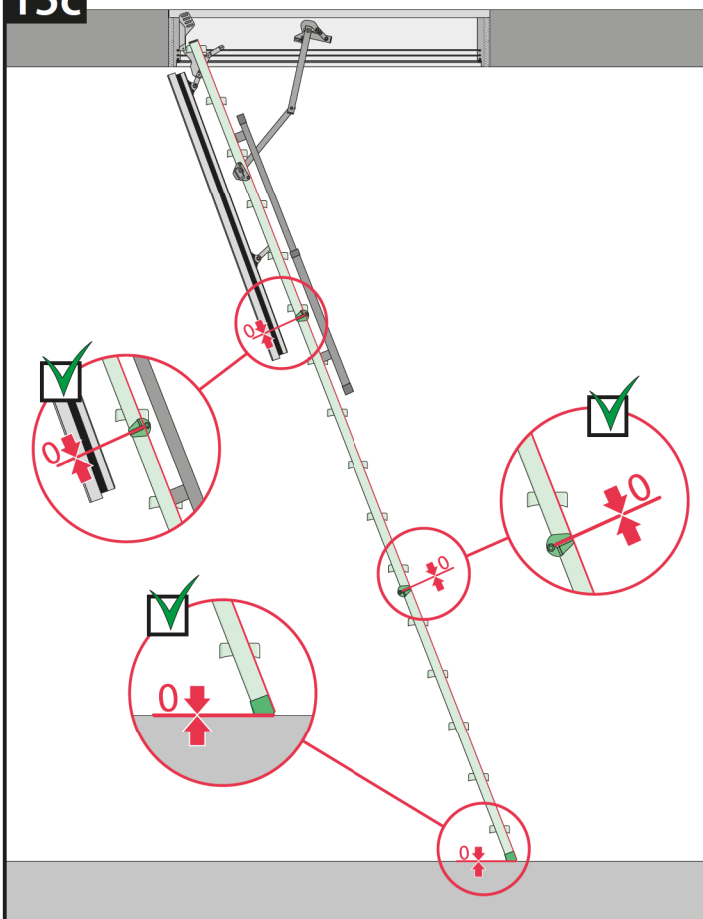

|    |                                                                                                                                                                                      |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| US | The ladder is too short - screw in the adjustment screw. Adjust the angle of inclination of the ladder to the floor to achieve conditions shown on step 15c.                         |
| ES | La escalera es demasiado corta - atornille el tornillo de ajuste. Ajuste el ángulo de inclinación de la escalera al piso para lograr las condiciones que se muestran en el paso 15c. |
| FR | L'échelle est trop courte - vissez les vis de réglage. Ajuster l'angle d'inclinaison de l'échelle au plancher de manière à réaliser les conditions montrées à l'étape 15c).          |

|    |                                                                                                                                                                 |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| US | The ladder is too long - unscrew the adjustment screws. Note: no more than 3/8". If the ladder is still too long go to step 14b.                                |
| ES | La escalera es demasiado larga; desenrosque los tornillos de ajuste. Nota: no más de 3/8". Si la escalera aún es demasiado larga, vaya al paso 14b.             |
| FR | L'échelle est trop longue - dévissez les vis de réglage. Nota : ne pas dépasser 0,8 cm ( 3/8 po). Si l'échelle est toujours trop longue, passez à l'étape 14b). |

## WARNING!

US

The bottom section must flush with the floor. Failure to proper adjustment of the ladder could result in unnecessary stress on the component parts, resulting in serious injury.

ES

La sección inferior debe estar a ras del piso. Si no se ajustan correctamente los pies de la escalera podría producirse un esfuerzo innecesario en los componentes, y esto puede resultar en lesiones graves.

FR

La section du bas doit arcehvêtrer pile au plancher. Un réglage incorrect des pieds de l'échelle peut générer des contraintes superflues sur les pièces, pouvant entraîner une blessure grave.

US

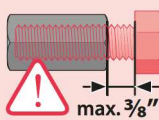

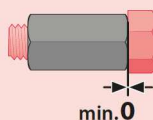

When changing the angle of the ladder with the adjustment screw, it is recommended not to unscrew the screw further than 3/8" as shown in the figure below.

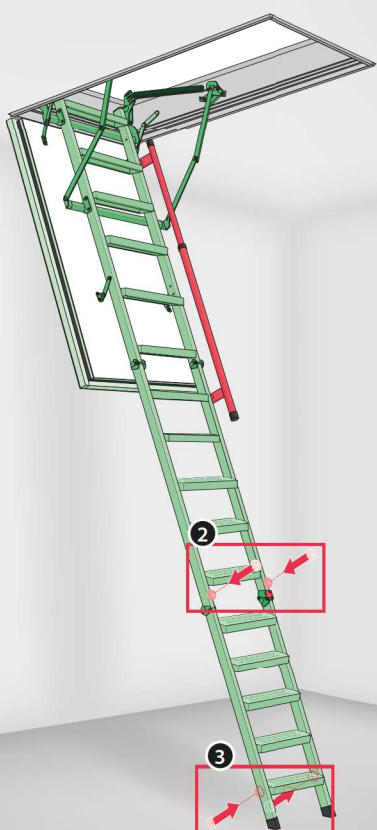

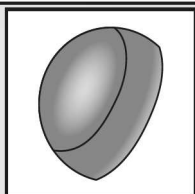

ES

Al cambiar el ángulo de la escalera con el tornillo de ajuste, se recomienda no desatornillar el tornillo más de 3/8" como se muestra en la figura siguiente.

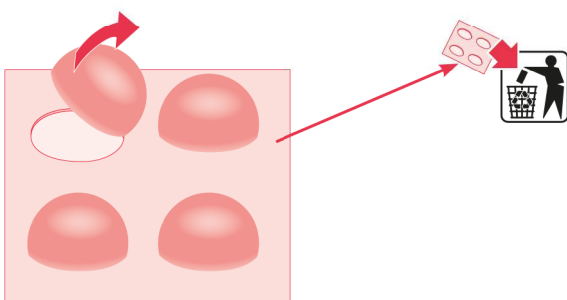

FR

Lorsque l'on modifie l'angle de l'échelle avec la vis de réglage, il est recommandé de ne pas dévisser la vis au-delà de 0,8 cm (3/8 po) comme l'indique l'illustration ci-dessous.
